

# QT-AT-KS adapter grommets

based on QT large, for Keystone couplers

The grommet QT-AT-KS is constructed on the basis of a large QT cable grommet. The polyamide body is moulded with elastomer.

The cut-out enables a snap-in assembly of all couplers based on the Keystone system. If required the keystone couplers can be disassembled with a screwdriver.

The insertion of QT-AT-KS into an icotek cable entry frame enables the routing of cables with and without connectors in combination with the creation of interfaces for Keystone couplers within one cable entry system. Separate cut-outs for connectors are no longer necessary.

QT-AT-KS provides ingress protection of up to IP54 (depending on the Keystone coupler type and manufacturer).
