At the underside of the KDR-BMP enclosure base plates a foamed PUR seal is attached. We now also offer these PUR seals separately for individual applications.

The PUR seal is applied to a carrier film that is self-adhesive on one side and is available in 2 widths. The length is 2150 mm each. The height of the seal results from the respective width. The PUR seal is easy to compress and has very good resilience.

Installing the PUR seal is very easy: remove the protective film, stick it on, done!
